WORK EXPERIENCE

CodeWell, Skopje, Macedonia — Senior UI/UX designer

MARCH 2014 - JUNE 2018

Award winning senior user interface and user experience designer with a knack for start-up and scale-up companies, with experience in the first [VC-backed](#) Macedonian startup. Proficient in both mobile and web platforms, I create digital experiences for mobile apps and websites alike. Daily duties involve collaboration with developers and stakeholders, designing sketches, wireframes and high fidelity designs based on user feedback, brainstorming sessions with clients to identify their needs. I also code web experiences using HTML, CSS and Javascript.

Work split between **consulting** with various companies from Macedonia and abroad, mentoring a junior designer and **bootstrapping products** with the company's founders.

PRODUCT EXPERIENCE

Letz — Product designer

OCTOBER 2016 - DECEMBER 2017

Designed an AI powered chat-bot mobile phone application that helps users with their tasks and to-do lists, using friendly conversation with a bot named Lucy.

The role included defining the user's needs based on research and feedback, iterating new designs that match the user's needs and improving the overall experience in the app.

Letz won Product Hunt's Golden Kitty award for [Bot of the Year](#) in 2016. The app was featured in [VentureBeat](#), [Huffington Post](#) and [Tech Crunch](#). Available on [Google Play](#) and [App Store](#).

Codewell.is — UX designer

<https://codewell.is/>

DECEMBER 2016 - MARCH 2018

In partnership with the junior designer, helped in the rebranding of the company's website. The goal was to establish the company as one of the leading IT companies in the region and abroad, and to attract new generation leads and potential customers. My role was to define and create seamless user experience throughout the whole website. I helped coding the website, defined and implemented animations and microinteractions in order to improve the general look and feel of the brand.

Estimo — Product designer

<https://costforapp.com>

MAY 2018

Designed the user interface and coded the front-end of a chat-bot app that estimates the cost to build an app through a friendly conversation with a chat-bot named Tim. My role included defining key parameters that can make the user feel like he/she is talking to a real person behind the scene. The app also sends a stylised and branded PDF document with the final estimation to the user's mail.

NOTABLE CONSULTING EXPERIENCE

Heineken — Mobile designer

Designed a mobile app that helps Heineken's employees easily maintain the production machines.

Screens available on [Dribbble](#) and in the portfolio link.

AngelART — Web designer

angelart.studio

Designed and developed a studio website for my friend and ex colleague. She's an artist who paints on canvas, so the challenge was to design a website that complements her visual style.

Popphoto.mk — Web designer

popphoto.mk

Designed and developed a website for a well known car photographer in Skopje.

Kniga.mk (Book.mk) — Mobile designer

Designed a tablet and mobile app Kniga.mk (Book.mk) for "TRI", a Skopje-based book publishing company.

Screenshots available in the portfolio

Publisher.mk — Web designer

publisher.mk

Designed and implemented front-end code (html, css) for "TRI", a Skopje-based book publishing company.

PUBLICATIONS

Online class for UI/UX design on Skillshare — Teacher

NOVEMBER 2018

Planned, designed, and recorded an online class for the Skillshare platform, where I teach UI/UX design by creating a mobile app from scratch. The class includes designing the user flow, user persona as well as designing the app itself which is about online booking for tickets. [The class](#)

OTHER RELEVANT EXPERIENCE

Deutsche Bank “Future Banking” Competition — *Participant*

AUGUST 2014

Took part in Deutsche Bank’s [“Future Banking” competition](#), reimagining the user experience on their mobile banking application. The design was featured on [Designboom](#). Screenshots available in the portfolio link.

Rockstart Accelerator, Amsterdam, The Netherlands — *Participant*

MARCH 2015 - JUNE 2015

Took part in [Rockstart](#), a four-month long acceleration program, with [MarkO](#) – CodeWell’s smart errands manager application. Was coached by various mentors about how to improve the product and grow our user base. The app is [featured](#) on Rockstart’s website.

Startup Weekend, Skopje, Macedonia — *Winner*

MAY 2015

Researched, designed, prototyped and made the pitch deck for a mobile app connecting nearby professionals over brunch. [Featured link](#)

Codefest Tech Festival, Ohrid, Macedonia — *Mentor*

APRIL 2017

Mentored and coached in a startup workshop that was part of the [Codefest Tech Festival](#) in Ohrid, Macedonia.

PORTFOLIO

Screenshots of the designs that I’ve been working on are available on the following [link](#)

Other relevant work is available on my [Dribbble profile](#)

TOOLBOX

Figma, Adobe XD, Photoshop, Illustrator

HTML (Pug), CSS (Sass), Javascript (Babel, jQuery, junior level of React), GSAP TweenMax, Prepros.io (for compiling)

* Can easily adapt to other tools (Sketch, InVision Studio)
